# START CamoWrapz™

## CAMOUFLAGE SHEETS FOR QUICK CONCEALMENT

*When deploying a covert sensor or camera system, camouflaging each piece quickly and discreetly is paramount. That hidden piece of equipment will be useless if it takes too long to install it, installers were observed, or the surrounding area was trampled. Now that site is burned. CamoWrapz™ was developed to maximize the efficiency of deployment, reduce the time to install and properly camouflage covert equipment. CamoWrapz provide just the right texture, color, and flexibility to work in any scenario.*

## Why CamoWrapz?

CamoWrapz are UV resistant and take paint very well. They can be used to wrap sensors, including cameras, quickly in the outdoor environment. Touch up paint can be applied if needed to complete the process.

CamoWrapz are available in 12x12-inch sheets. They can be easily cut into strips or other contours that allows for easy application to specific equipment. CamoWrapz can be attached with staples, screws and in some cases double sided tape. If care is taken in removing the wrap, it can be reused over and over.

Two textures are currently available: Deep Bark and Smooth Timber. The more aggressive grooves of Deep Bark are ideal for camouflaging larger objects on more mature trees with thick bark. Smooth Timber has a less aggressive texture for camouflaging objects on younger trees or even wooden planks.

More textures are in development.

### Features

- Quickly deployable
- Readily accepts paint
- Flexible
- UV resistant
- Easy to cut and shape

# About us

WilliamsRDM is a woman-owned, small business dedicated since 1963 to the design and manufacture of military grade automated test equipment, cable assemblies, connectors/adapters, and electronic hardware. We have decades of experience in all phases of electrical, mechanical, and software engineering—performing innovative new product development and manufacturing in Fort Worth, Texas.

We have a reputation for consistently meeting customer requirements for quality, delivery, risk, and value. WilliamsRDM is a complete turn-key operation; all manner of business—from fabrication and assembly to design and engineering—are conducted in-house.

## Applications

- Ground Sensors
- Game Management
- Border Security
- Tactical Operations
- Wildlife Detection
- Prisons Perimeters
- Special Forces
- FOBs

## Specifications

DIMENSIONS	
LENGTH X WIDTH	12in x 12in (31cm x 31cm)
THICKNESS	1/8 – 1/4 in (3 – 6mm)
MATERIAL	
BASE	UV resistant / Paintable Urethane
COLORS	Tan, Dark Green, Charcoal, Grey

\*All weights and sizes are approximate depending on the application and form factor.
